

Warranty conditions :

Within 6 months and the batteries have to be stored under normal conditions (temperature 15-25 ° C and the single cell voltage 3.80 - 3.90V);meanwhile the user must ensure that they comply with the operation manual and charge the battery with qualified balance charger.

We will replace the damaged lipo batteries with new ones, but not refund in case that the problems as following:

1. Zero voltage before used.
2. The capacity is lower than 80% of the standard before used.
3. There is the swelling or the leaking before used.

The definition for the low voltage of lipo batteries:

- a. The single cell voltage <3.7V if being stored in 7 days
- b. The single cell voltage <3.65V if being stored in 1 month.
- c. The single cell voltage <3.5V if being stored in 2-6 months.

But we will not replace the batteries if the problem is caused by the following reasons :

- 1.Man-made cause and not the problem of battery itself.
- 2.After 150 times cycle life used within 6 months.
- 3.The batteries are not charged with the qualified balance charger.
- 4.Not comply with the operation manual .
5. The batteries are overcharged and over discharged.

All lipo batteries have been tested and packaged in good condition before dispatch. In case they are defective when you received please contact us as soon as possible. And we will solve the problem at once.
